

Muhittin Dari

Computer Engineer & AI Operator

Hi! I'm a full-stack developer with a degree in Engineering and Architecture, graduating as the **top student of my faculty**. I mainly work with **React Native**, **Next.js**, and **NestJS**, building both **web** and **mobile** applications. On the backend, I develop **REST** and **GraphQL APIs** using **TypeORM**, **Sequelize**, and **Mongoose**, and I work with technologies like **Docker**, **AWS**, **Redis**, and **Elasticsearch** to make projects scalable and efficient. On the frontend, I use tools like **Tailwind**, **Bootstrap**, **SASS** & **SCSS**. I'm truly passionate about constantly learning and improving my skills.

As a hobby, I develop games using C++ and Unreal Engine. From time to time, I also work on my Minecraft clone project using C++ and OpenGL.

I'm looking to work in an environment that's full of young spirit, where curiosity, constant learning, and collaboration are at the core. It's really important for me to be part of a team where ego has no place, and where everyone supports each other to grow and build great things together.

Education

2023 - *

**Electric Electronic Engineering
(Masters Degree)**

Yozgat Bozok University

2017 - 2021

Computer Engineer

Yozgat Bozok University

Expertise

- React Native
- React
- Next JS
- Nest JS
- Node JS
- TypeScript

Language

English

Experience

2024 - 2025

TheaTech

Fullstack Developer

Worked as a fullstack developer using monorepo frontend - Next 14 - GraphQL - MongoDB

2023 - Resigned at 25/06/2024

Hey Teknoloji

React Native Developer

I worked as a React Native Developer. I have developed a lot of React Native apps these are live right now.

2023 - *

Tekspiyasa (Personal Project)

Fullstack Developer

I'm working as a fullstack developer for our new project, which will serve the textile industry. I'm using NestJS on the backend side and NextJS, TailwindCSS and Material UI on the frontend side.

2022 - 2023

Simdatix

React Developer (+Next JS)

We undertook the CMS and web site of RoadJet (Brand of a tourism company in Germany) with React, NextJS and numerous libraries. We supported our work with Atlassian tools (JIRA, Confluence, Bitbucket). We preferred Agile Scrum for our working methodology. Whatever there is in the original documentation about React, I have become familiar with every subject here and I can use it easily.

2021 - 2022

Bilinova Bilişim

React - React Native - NodeJS - MongoDB Developer

I worked with React, NextJS and React Native on both the web and mobile side of the project.

2020 - 2021

Consintegra (Tubitak Marmara Research Centre)

Intern

Using Qt Framework and C++, I created an automation of a robot that will serve under the roof of urban infrastructure imaging systems. Communication with the robot was established via serial port, video recordings and images were taken, manhole definitions and related project files were created, panoramic images were created from two 180+ degree camera images obtained as a result of the analysis, and a report could be created for the faulty parts of the channel by navigating the image after panoramic image creation.

2020 - 2020

Bitcraft Software (Konya Teknokent)

Intern

I have conducted short-term research on drones.

RECENT PROJECTS THAT I DEVELOPED

React / NestJS

App for Government Use

I developed a software called (İKİS) (İhbar Koordinasyon ve İletişim Sistemi) , which will serve the state's intelligence service, customs protection and narcotics, and will enable the communication and coordination of intelligence units.

QFix (in development)

This is one of the best apps I've ever been a part of. AI & Well Done UI & Perfect Backend. By part of, i dont mean I just created little parts of it, i created the whole backend and half of frontend. We used n8n for this app.

[QFix Web](#)

Pazareo (in development)

A mobile project for second hand purchase and sale for Azerbaijan, but with more options and alternatives. I personally undertook the whole backend. It has Appstore and GooglePlay apps.

[Web](#)

React Native

Vida

Vida is a maintenance operations management solution that provides the tools and information maintenance teams need to run operations efficiently and effectively.

[Google Play](#) [App Store](#)

Hascevher

As we Hascevher , on this way we set out with the slogan "Cook with Love", we are now taking our place in the Google Play Store and App Store . Get our application for product promotion videos, current catalogs and more. Harvest. Cook with Love...

[Google Play](#) [App Store](#)

Cotcast AI

Join us in keeping tabs on the cotton market. With our analysis backed by global data and up-to-date information, you can stay ahead of the trends in the cotton industry. Access detailed insights on cotton production,demand, stocks, and prices worldwide to make informed decisions. Embark on the right journey with us to compete in the cotton market, manage risks, and seize opportunities.

[Google Play](#) [App Store](#)

Akedaş

Kahramanmaraş Akedaş Electricity Distribution - Mobile application (under development)

NextJS

Tekspiyasa

Tekspiyasa is a large-scale project that we have embarked on with my friend Medet Oruç, who has a long-established family in the textile industry, which will create a movement in Turkey. It is my fullstack project where I wrote the backend with NestJS and the frontend with NextJS. It is still ongoing.

Yük Getir

"Yük Getir" was a high potential project that provided jobs for truck drivers. It was closed after the company's decisions.

Roadjet

Roadjet was a bus company from Germany that provided high standards of comfort. We (two of us) undertook their web software (including the admin panel). The company decided to close down after a while.

Education

2023 - *

Yozgat Bozok University

Electrical and Electronics Engineering (Masters)

I am continuing my master's degree

2017 - 2021

Yozgat Bozok University

Computer Engineering (Bachelor)

I graduated as a top student from the Faculty of Engineering and Architecture.
