PERSONAL INFORMATION :

Full Name : Muhittin Dari

Date Of Birth : 02/07/1995

Marital Status : Single

Military Service : Exempted (31/12/2024)

Hello, my name is **Muhittin** and I'm a software developer with a **Bachelor's degree in Computer Science**. I've graduated from **Faculty of Engineering and Architecture** as a **top student (1st degree)**. With over **2 years** of professional experience, I have expertise in **React** development, including **React Native**, as well as **server-side** technologies such as **NestJS, Node.js, Express**, and databases like **SQL and NoSQL** databases such as **MongoDB, MySQL and MSSQL**. I've also worked with **ORM tools** like **Sequelize** and **Mongoose** to interact with databases. In addition to this, I have experience working with **AWS services** including **S3, Cognito, API Gateway, Lambda**, and **Amplify**. Additionally, I have experience working with **REST APIs** and consuming data from external services.

My skillset also includes **Next.js, TypeScript, Redux, Redux Toolkit, Axios**, and **Context API**. In my previous roles, I have leveraged these technologies to build scalable and performant web applications. For example, I worked on a project where I used **Redux Toolkit** and **Axios** to handle data fetching and state management. I've also used **Next.js** to build **server-side rendered** applications that provide a fast and seamless user experience. I have production experience with **React and Hooks (useState, useEffect, useCallback, etc.)**, which allows me to develop efficient and maintainable React components. Additionally, I have experience working with front-end libraries such as **Material UI, Bootstrap**, and **Tailwind**.

I'm always looking for new opportunities to apply my skills and knowledge to real-world problems, and I'm excited about the possibility of working with a team of like-minded individuals.

SKILLS :

- Expertise in React, including React Native, and related technologies such as Next.js, TypeScript, and Node.js.
- Experience with Cloud ecosystems, including AWS services such as S3, Cognito, API Gateway, Lambda, and Amplify.
- Strong problem-solving and analytical skills, with a focus on delivering high-quality code.
- Collaborative team player with excellent communication skills, able to work effectively with individuals across diverse backgrounds and skill levels.
- Proactive and dynamic, always looking for ways to improve processes and products.
- Well-organized with excellent time management skills, able to prioritize tasks and meet deadlines.
- Experience in agile development methodologies such as Scrum or Kanban.

FOREIGN LANGUAGE :

English : Listening and writing are **very good**, speaking is **good**.
My **E-YDS** exam score is **77,5 (C Level)**

PROJECTS

React.JS & Next JS

- I am creating frontend side of the our new project 'Tekspiyasa'. Currently in development. 02/02/2023
- I created an online image compressor application in one day with NextJS. Please ignore its appearance.
<http://www.jpegzipper.com> 08/03/2023
- In two days i developed my own website as a showcase for my skills. <http://www.darimuhittin.com> 11/01/2023
- Over a period of two weeks, I designed a web application with nextjs from scratch for a company called Simparts. It is not live yet. For Develop domain :
<https://dev.d547av3zqpb8a.amplifyapp.com/about-us>
- We wrote the Roadjet app (<http://www.roadjet.de>) and its advanced CMS (I don't put links because only the operators have access.) from scratch at Simdatix.
- I undertook both backend and frontend needs and database designs of the YükGetir application at Bilinova Bilişim.
App : app.yukgetir.com
Landing: <https://www.yukgetir.com/>
(Access may not be available because the company has decided to close down.)

NestJS

- I am creating backend side of the our new project 'Tekspiyasa'. Currently in development. 02/02/2023

Flutter

- I worked on RoadJet's mobile app.
[Play Store](#)
[App Store](#)

React Native

- I met the necessary needs on the mobile side of the YükGetir application.
[Play Store](#)
[App Store](#)

NodeJS

- I took part in the maintenance and development of the backend of the YükGetir and RoadJet applications.
- Using node for our new project Tekspiyasa's backend.

EDUCATION

Bozok University Computer Engineering (Undergraduate)

I graduated as a top student from the Faculty of Engineering and Architecture.

WORK EXPERIENCE :

Tekspiyasa (Fullstack Developer) (Feb 2023 – Today) :

I am working as a fullstack developer for our new project, which will serve the textile industry.

I am using **NestJS** on the backend side and **NextJS, TailwindCSS** and **Material UI** on the frontend side.

Simdatix (Frontend Developer) (May 2022 – Feb 2023) :

We undertook the **CMS** and **web site** of **RoadJet** with **React, NextJS** and **numerous libraries**. We supported our work with Atlassian tools (**JIRA, Confluence, Bitbucket**). We preferred **Agile Scrum** for our working methodology. Whatever there is in the original documentation about **React**, I have become familiar with **every subject** here and **I can use it easily**.

Bilinova Bilişim (Fullstack Developer) (6 Months) :

I worked with **React,NextJS** and **React Native** on both the web and mobile side of the project.

Vizyon Design (Yozgat Teknopark) :

PHP & Laravel - web application with 3D payment system with credit card.

Jazari Dynamics (Tubitak Marmara Research Center) (Intern) :

Using Qt Framework, I created an automation of a robot that will serve under the roof of urban infrastructure imaging systems. Communication with the robot was established via serial port, video recordings and images were taken, manhole definitions and related project files were created, panoramic images were created from two 180+ degree camera images obtained as a result of the analysis, and a report could be created for the faulty parts of the channel by navigating the image after panoramic image creation.

Bitcraft Software (Konya Teknokent) (Intern) :

I have conducted short-term research on drones.
